Chinook, Alberta, Thursday, Oct. 5th. 1939

NO

SALMON SANDWICH DE LUXE

Remove bones and flake one small can of salmon. Mix with 2 tablespoons horseradish, 1 teaspoon lemon juice, 4 tablespoons mayonnaise, seasoning, spread generously between bread slices; spread outside of each sandwich with melted butter, toast on both sides under low broiler heat until brown. Dress with the sandwich; a sauce made of melted cheese.

POTATO AND FISH CASSEROLE
Flake one pound of canned or cooked fish and place in casserole. Slowly melt 1/2 lb. cheese in double boiler; stir in 1/2 cup milk. Pour this over the fish. Cover the mixture with mashed cooked potato, and line the rim of the casserole with unbaked biscuits. Bake in hot (425°) oven until biscuits are done.

There are so many delicious varieties of Canadian FISH available all the year round, no matter where you live, that you can add pleasing new dishes to the family menus.

And remember, Fish is nourishing, and is easily digested. Ask your dealer about the different kinds of Fish he can get for you, and arrange to serve Fish to your family often.

DEPARTMENT OF FISHERIES, OTTAWA.

LOCAL NEWS

Mrs. W. H. Davis who operates a nursing home at Brooks, returned after having spent two weeks on the farm here with her family.

Bruce Hutchinson, son of Mr. and Mrs. Geo. Hutchinson of the Peyton district, came to town Monday where he will attend high school.

Mr. Matt Gruber of Hanna visited at the home of Mr. and Mrs. F. Otto Sunday.

Mrs. A. E. Roberts is spending a few days her daughter, Mrs. Proudfoot this week.

Miss Margaret Maurer went home on Tuesday.

The Chinook United Church Sunday School which was closed during the holidays will be reopened on Sunday, October 15th.

Mr. J. Charyk, B. S., Supt. Mr. B. Youell, Sec-Treas.

Mr. M. MacLean of Alsask visited with his sister, Donalds over the week end.

Mr. and Mrs. A. Carlson of Vermilion visited with the former's father over the week end.

Mr. J. Charyk went to Oyen on Thursday, where he attended the Teachers' Convention.

Miss Joan Bawley of Calgary arrived Sunday, and will visit with her parents, Mr. and Mrs. J. C. Bayley.

Mr. Burt Robison of Alsask, was a Chinook visitor over the week end.

Gordon Wilson returned to High school this week.

The Misses Marguerite and Doris Hittle went home for the weekend and holiday.

Miss Ryler is attending the Teachers' Convention at Oyen this week.

Miss McDonald is attending the Teachers' Convention at Oyen this week.

The Misses Rasmussen went home for the weekend and the holiday.

Mr. Faulkner of Big Stone was a Chinook business visitor Wednesday.

Puffed Wheat with Silk Tablecloth	73c
Mothers Cocoa	2lb tin .45c
Fancy Pink Salmon	2 tins .35c
Grape Juice	50 ounce tin .35c
Orange	" " " .37c
Dried Apricots choice	lb .24c
Dried Pruns	40-50 lb .10c
Oranges, Lemons, Tomatoes	Prunees, plums and McIntosh Red Apples

Now is the time to look over your Storm Windows.

Glass, Putty, and Radio Batteries

BANNER HARDWARE AND GROCERIES

Sunday, October 8th, is a day of national prayer—"of humble prayer and intercession to God" in the words of the Ottawa proclamation. The proclamation sets forth that Canada has been forced to take up arms in defense of rights and liberties unjustly attacked, and to prevent unprovoked aggression.

Engagement

Mr. and Mrs. Norris F. Marcy, of Brooks, announce the engagement of their youngest daughter, Doris Evelyn, to Mr. Edwin Hugh Dinzey, jr., eldest son of Mr. and Mrs. Edwin Hugh Dinzey of Cremona. The marriage will take place in November.

Quebec Election.

Three Rivers—A general election will be held in Quebec on October 25th. In the statement announcing his decision, Premier Maurice Duplessis declared it has become necessary "to submit to the electorate questions of the greatest importance, some of which, the most vital ones, have arisen recently."

Although he gave no direct indication what these questions were, the Union Nationale premier said his province intends "to preserve its full autonomy", and charged the federal government with working the pretext of the war to accentuate "a campaign of assimilation and centralization."

Mr. Gus. Heines—living south of Youngstown, suffered from a paralytic stroke last week, but has improved some up to time of writing.

The Problems Of War

The war in which Canada is currently engaged as an active participant may be expected to solve, at least temporarily, some of the problems which have sorely afflicted the country in the past few years. On the other hand, it may serve to accentuate some problems later on, if not now.

It is apparent, for instance, that in a war of even moderate duration, a wide scale relief problem is destined to vanish for the time being. Certainly, with the demand for man power for the fighting forces, for accelerated industries and to some extent for augmented agricultural effort, there should be none left in the urban centres, except those who would normally be unemployed by reason of advanced age or physical or mental infirmity. Even some of the latter will, no doubt, find it possible to make some contributions towards their own support under war conditions.

In the rural districts, which will be called upon to supply allied belligerents with large quantities of foodstuffs, a widespread relief problem is almost inconceivable while the war is in progress, except where such condition may be induced by complete crop failure over a wide area—a condition which it is hoped will not recur in the lifetime of the present generation. Even, however, if crop failure should occur as a result of drought or from any other cause, it is a reasonable assumption that many resourceful country residents would be able to find some more or less remunerative occupation in the larger centres, opportunities afforded because of the existence of a state of war.

The Railway Problem

The war, too, may be expected to ameliorate the national railway problem. If Canada is to fulfill one of her principal missions in the war she will not only provide the allied fighting forces and their nations with large quantities of food, but also substantial supplies of arms, munitions, aeroplanes and possibly ocean bottoms, as well as raw materials for the processing of these and other commodities outside the country.

The transportation of such raw materials and finished commodities may reasonably be expected to furnish the railways with a very material increase in tonnage to the full extent of available rolling stock and space, so long as the allied navies are able to keep the sea lanes between this continent and Europe open. Hence, as long as the war is in progress, a big increase in railway earnings may be expected with a corresponding shrinkage in deficits.

The war may also be expected speedily to terminate the expenditure of considerable sums of money on public works of the type now still being authorized by the federal government as unemployment relief measures. Not only should there be no unemployed requiring assistance in this or any other form, but the monies now being used for this purpose will undoubtedly be required for the prosecution of the war.

Sacrifices In Prospect

While the sharp curtailment or disappearance of these irritating problems may be anticipated by the duration of the struggle overseas, the other side of the balance sheet is destined to show some losses, temporarily at least.

For example, there is little doubt that the war will bring a halt to the demand for larger expenditures for social reforms, not only because the money which might have been allocated for such schemes under happier auspices, will be required for the more vigorous prosecution of the war, but also because improved economic conditions will reduce to some extent the necessity for such expenditures. In this category may be placed such social projects as state hospitalization and medical care, extension of the old age pension plan and others of that type.

It is even possible that the exigencies of a prolonged war may, in course of time, necessitate reduction in expenditures for such highly essential services as education and public health, a contingency which, it is devoutly to be hoped, can be avoided. One of the surest ways of avoiding such a misfortune is to prosecute the war with economy and strength, and with purpose and with all the available resources, that it will be brought to as speedy a conclusion as possible.

There are many cherished schemes, existent and potential, which may have to be sacrificed or curtailed before the war is over, but the most certain way to reduce these sacrifices to a minimum is to make the prosecution of the war the matter of greatest concern, and that, in turn, signifies a joint co-operation on the part of the country and its people. There is no one who cannot make some contribution towards a speedy termination of the war. Until the war is over, the social and economic progress of the country on a sound basis is bound to be hampered and delayed.

Blackout Glass

Ingenious Lighting Scheme Has Been Introduced In France

In Europe much of the engineering ingenuity of the nations is currently devoted to the devising of ways and means to protect cities from the ravages of air raids. One of the first rules of self-preservation in the event of night air raids is that there should be no visible light emanating from buildings. In France this is accomplished by ingenious lighting scheme has been devised to foil night-time bombers. It consists merely of a combination of blue glass windows and orange lamps.

When the correct degrees of coloring are attained, the rays of the orange lamps do not effectively pass through the blue window panes, and are thus invisible to aircraft at night. The blue windows will pass about 75 per cent. of the incident sunlight by day.—Brandon Sun.

Will Serve Without Pay

Approximately 100 men have sent offers to the Voluntary Service Registration Bureau, Ottawa, to serve without remuneration in any capacity in which the government might need their services, the bureau revealed. One man who recently retired from a \$30,000-a-year executive job is ready to serve on a dollar-a-year basis.

If small indentations are counted, Maine has more than twice as much coastline as Florida.

Turtle racing is popular in Maldenhead, England, a ten-yard race lasting about an hour.

Flying Salesman

Aerial Drummer Is Able To Cover A Lot Of Territory

E. W. Cleveland, who refers to be known as "Pop", is perhaps the country's foremost flying salesman. Pop, who sells airplane struts, has a territory that would make most salesmen hand in their resignations. He covers the United States and Canada—and he covers them in a plane which has a top speed of 187 miles an hour and cruises at 145.

"I've been flying my territory since 1927," the aerial drummer said. According to "Pop", there are hitch-hikers for airways, as well as highways.

"There's just one thing I demand of a passenger when I give him a lift," he said. "If there's no schedule to meet, and I see a spot that suggests good trout streams, he has to be willing to land with me and fish for a while. I always carry my tackle with me."

Awarded Baby Medal

Dr. C. H. Best Of Toronto First Canadian To Receive It

The first Canadian to be so honored, Dr. C. H. Best, head of the Department of Physiology in the University of Toronto, has been awarded the Baby Medal by the Royal College of Physicians of England, an award made every alternate year to the person deemed to have most distinguished himself in physiology.

The medal, of the value of \$100, is customarily presented on the occasion of the Harveyian Oration on October 18, and Dr. Best was invited to be present.

Dr. Best has also been awarded the John Mallett Purser Lectureship by the medical faculty of Trinity College, Dublin, and hopes to be able to deliver the lecture a little later.

One-Armed Man Clever

One-armed George Martin of Copthorne, England, can use a wheelbarrow and motor mower, dig, cut turf, prune hedges, fell trees, drive a three-horse team and care four bricks at a time. Martin also plays golf, cricket and billiards, and is a good shot.

THAT REMINDS ME—THERE'S NO CLOSED SEASON FOR OGDEN'S

Try Ogden's and you'll know why particular roll-your-owners vote it the cigarette tobacco of double barrelled pleasure. You'll roll them better with "Chantrelle" or "Vogue" papers.

Noted Scientist

Professor Sigmund Freud Dies At His Home In England

Professor Sigmund Freud, 83, famed originator of psycho-analysis, died at his Hampstead, London, home recently. Freud left Vienna and came to England after German annexation of Austria last year.

The aging scientist arrived in London June 6, 1938, in search of "peace, study and work."

"I am looking forward to my future life with my students, my books and my studies in England," he said.

"They let me bring some things out of Austria—enough to work with. I still have my manuscript on the Bible and my own personal books and papers. Everything else—all my money and my property in Vienna—is gone."

With him when he came to England were his wife and their daughter, Anna, his son Ernst and a nephew, Harry Freud. The Jewish scientist was the first prominent Jew allowed to leave Austria after the German annexation.

At the time of his death, Dr. Freud, whose researches on the influence of sex on behavior won him world-wide fame, still was working on the book in which he intended to show how the Bible reflected the subconscious yearnings and fears of the peoples of antiquity.

Is Working Long Hours

But Britain's Prime Minister Appears Healthier Under Strain

Prime Minister Neville Chamberlain, working harder in his 71st year than ever before, seems to be healthier and happier under the strain of war.

He seems to have new strength and a more youthful vigor. He walks with a light step and almost with a military air.

When Chamberlain speaks to Commons, his voice carries to every part of the House.

He works at least 16 hours a day, but still manages to carry out much of his peace-time routine.

Always an early riser, one of his first concerns still is to look at the flowers and birds in his garden before breakfast. Then he and Mrs. Chamberlain take their morning stroll in the nearby park. And, best of all, his friends say, his gout has vanished.

Must Be Licensed

Order-in-Council Now In Effect Governs Metal Exports

Metal such as copper and nickel may be exported from Canada only under license obtained from Hon. J. L. Stacey, minister of revenue, it was announced.

Licensing of such metal exports, a wartime measure, was authorized by order-in-council and the system has already gone into effect.

Licenses for export to the United States for consumption in that country are being given freely, government officials made clear, and it is expected the licensing provision will exert little interference with normal business and trade.

The measure was taken partly to prevent valuable metals from being traded to the enemy and partly to conserve domestic supplies. It applies to all key metals.

Only death can arrest the homing flight of a homing pigeon.

Albania is to have 750 miles of centuries-old roads rebuilt.

Message From Queen Mary

Expresses Admiration For Wonderful Spirit Of British Women

Queen Mary issued a message from Marlborough House expressing admiration for the "wonderful spirit" with which British women are meeting wartime emergencies and difficulties.

Her message read: I wish to express my admiration at the way my countrywomen have come forward in thousands to give help in the present emergency. The Queen, my dear daughter-in-law, has told me of the wonderful spirit shown all sides, of which she has found ample proof in her visits to various centres.

I wish to send a special greeting to all nurses, who particularly those belonging to services of which I am president—Queen Alexandra's Royal Naval Nursing Service and the Territorial Army Nursing Service.

I know that they will carry out their arduous duties in the splendid tradition of those services and I would like them to know that they have my good wishes wherever they may be.

At the same time, my daughter, the Princess Royal, asks me to join with her in sending greetings to all members of the Princess Mary's Air Force Nursing Service.

I am mindful also of the invaluable work of the Queen's nurses, who are exceptionally busy now in the reception areas. It is my constant prayer that God's blessing may be on the meritorious work of all nurses throughout the empire.

Rates A Little Lower

Northern Points Favored On Newspapers And Periodicals Sent By Air

A reduction in air mail rates on newspapers and periodicals to and from distant northern points was announced by Postmaster-General Norman L. McLarty.

The new rates, now effective, will affect distant settlements and mining camps in the Northwest Territories, British Columbia, Alberta, Saskatchewan, Manitoba and Ontario. Telegraph Creek, B.C., will be eligible for the reduction in winter only, the announcement said.

When mailed by the public, second class matter may be sent to such points at the rate of one cent for each four ounces or fraction of four ounces. Posted from the office of publication or from newsmen, the rate will be four cents a pound.

The regular air mail postage requires six cents for the first ounce and five cents for each additional ounce.

Lady (viewing pompous gentleman): "He's a baronet, eh? How did he get his baronetcy?" Friend: "Tobacco?" Lady: "How many coupons?"

Ninety per cent. of tire troubles and tire accidents occur during the last 2,000 or 3,000 miles of the tire's life.

War And Science

Many Advances In Human Knowledge May Be Expected

Every one is asking the question these days: What will be the effect of the war on this and that? What, for example, will be the effect of the war on science? Part of the answer to that question lies in the past. What was the effect of the World War on the science of that day?

War in 1914-1918 increased the importance of science. In some respects, of course, the activities of science were inimical to human beings. This was especially true of the activities of science in Europe.

In Germany great strides were made in chemistry, but it was partly the chemistry of poisonous gases. There was, however, the chemistry of synthetics, and German scientists developed a great many usable substitutes for the raw materials they could not get on account of the Allied blockade.

But not only chemistry benefited by the World War. British and French scientists made great strides in the development of the physical sciences of radio and aviation. And surgeons behind the lines everywhere added to their knowledge of human physiology, and their skill in patching up casualties.

All of these advances, however, were not exactly pleasant to behold, for they were made at the expense of a torn and bleeding humanity.

It is not until one turns to the history of science in America during the War that one finds much joy in the picture. American scientists of that day kept themselves informed what was going on in darkened Europe, and at the same time devoted their energies to carrying on those developments that would bring permanent good for all mankind.

In that experience, then, there is an approximation of what the effects of this war will be on modern science. There will be advances in Europe at mankind's expense. America will carry the torch of pure research.—Winnipeg Free Press.

No white man ever saw one of New Zealand's strange big birds, the moas, which died out centuries ago.

Rust and corrosion cause an annual direct loss exceeding that caused by fire and flood combined.

The Weeping Willow

Interesting Story Relates That Tree Came Originally From Smyrna

The weeping willow is an exotic in Canada, coming to the North American continent from the east through the agency of the English poet, Alexander Pope, states George A. Stevenson, gardener at the Dominion Experimental Station at Rotham, Sask.

The story goes that Pope was present when the cover was being taken off a box of fruit shipped to England from Smyrna and observed that one of the sticks appeared as if it contained some life. He planted it in the hope that it would grow into something not known in England, and from this grew the willow tree that has given birth to so many others. During the American Revolution, a young British officer brought a ship of Pope's tree with him across the Atlantic, and from it, it is said, have come all the weeping willows in North America.

Linnaeus, the great botanist, named the tree, Salix Babylonica, or willow of Babylon, in allusion to the passage of the 137 Psalm, where the captive children of Israel are represented as hanging their harps upon the willows by the rivers of Babylon.

Limit Of Air Speed

For Military Aircraft 600 Miles Per Hour Is Set By Experts

A 600 mile-an-hour speed limit for military aircraft was set by an expert at the British Association meeting at Dundee.

The expert is Mr. H. E. Wimperis, director of scientific research at the Air Ministry from 1925 to 1937 and president of the engineering section of the meeting.

A definite limit was being imposed by the laws of nature, he said. If rapid manoeuvre was required then the speed must be controlled to suit the conditions.

In regard to civil air services, Mr. Wimperis said that there were good economic reasons for speed to settle down in the 200 to 300 miles an hour range.

CHAPTER VI.—Continued

The night the canoes reached the forks, the police came to Alan's camp.

"Well, Cameron, we're here," said McQueen, with a sigh of satisfaction, lighting his pipe with a red ember from the supper fire. "Now it's up to you to decide whether you're going to stay stiff-necked and later pay the penalty of the law, or will decide to be sensible and talk."

"We've been all over this, sergeant," demurred Alan, with an air of indifference which belied the anxiety that harassed him. "It's not up to me. It's up to you. You say McQueen is somewhere in this country. Now which river are you going to take to the height-of-land?"

For a space McQueen closely studied the baffling features of the man whose gray gaze did not waver. Then his shaggy brows met and his pale eyes glittered ominously.

"We're going to cover all three rivers before the ice," he snapped.

Alan glanced at Noel. There was no time to cover the wide headwaters of even one river before the ice. His heart pulsed in his throat as he asked with seeming indifference: "Well, which first?"

"We've been all over this, Sergeant," demurred Alan.

"Your country's on this north branch, you say?" McQueen leaned toward the other as he went on, almost languidly. "Well, young man, I figure that's just where you ran into McQueen—in your own country."

Like a flash, inspiration came to Alan. Here was his chance! Slowly over his bronzed features crept a look of frustration—of defeat. His

Fiery, Itching Skin Gets Speedy Relief

Here is a clean, stainless, penetrating antiseptic now dispensed by chemists as itching ointment. That's the difference between it and the itching and distress of Psoriasis, Itching Skin and other skin troubles. Not only does this great healing antiseptic ointment promote rapid and healthy healing in open sores and wounds, but it also soothes and relieves itching and burning. It is instantly stopped, the eruptions dry up and scale off in a very few days. The same is true of Dermatitis, Eczema and other skin eruptions. You can obtain Moore's Kamagra Oil (full strength) at any modern drug store.

eyes shifted before the fixed stare of the policeman as, expelling the breath from his lungs in a deep sigh, he horrified the listening Noel with: "What's the use! You're bound to get him before you're through—you police always do, they tell me. We met McQueen last winter on the headwaters of the Mad River."

On the Indian's swart features there was a lightning swift transition from a look of pained surprise to one of stolid acquiescence. Gravelly he nodded agreement with Alan's startling admission, as he met Slade's glacial glance.

"Ah-hah! So that's it, is it?" With a grunt of satisfaction the delighted McQueen thrust out his big hand and gripped Alan's. "Now you're talking like a good citizen, my boy!" he cried, slapping the hunter on the back. "Shake with the boys, Tom! I knew they'd come through!"

So with much handshaking and patting of Alan's broad back the police led their dogs to their camp. When they were well out of hearing on the moonlit river, Alan turned to Noel.

"It was our best chance," he said, "to send them up the Mad River. We'll take them into the Caribou Lake country, across the ice, while one of us strikes across country to the Talking and warns John. I was afraid, Noel, they'd want to try the Talking first, so I threw up my hands to head them off."

"Ah-hah! We get dem een dose mance little lae, w're de water run bet' way, den dey not get still de ice."

For a long space Alan sat staring into the fire. "It'll give John a chance to lose himself somewhere over the height-of-land before they come back here to the forks and start with their cross to hunt for him on the first day."

"What day do wid us—dose polece, w'en dey see we fool dem?"

"This will make us outlaws, Noel—helping a man wanted for murder. Outlaws!"

The Montagnais "Moon of the Falling Leaves" was riding the sky above the tundra-sentinelled valley of the Talking River. The days of the long twilights were over and, earlier and earlier, the swarming stars stippled the violet sky. One September morning, a girl stood on the shore of the river beside a path leading back through the timber to a clearing. She wore heavy whipcord breeches, laced below the knee, high woolen socks and moccasins. At her belt of plaited caribou hide hung a small skinning knife and a sheath ornamented with colored beads. In her strong, round arms, from which the sleeves of her gray, woolen skirt were rolled high above the elbow, was a bundle of washing.

The girl put the clothes to soak in a small pool dug in the sand beach, then dropped to her knees and with a finger idly made tracings in the sand. After a while the swish of whipping wings caused her to lift her eyes. Within a few yards of the shore three sheldrake skittered downstream. A Canada Jay croaked from an aspen whose yellow leaves shivered in the breeze. She looked at her tracings and smiled as she read the name, Alan Cameron. Again there

was a whipping of wings and five sheldrake passed.

"I wonder what's startled the ducks?" she said aloud, glancing up river.

Far above her Heather made out a dark object moving along the opposite shore downstream, appearing, only to disappear again among the willows and alders.

"A bear!" she cried.

Then her mouth opened slowly in surprise as she stared at the opposite shore. "Why—there it is!" she gasped. "But it's not a bear! It's—it's a dog! It can't be! Yes, it is, it's—who-hoo! Roughy! Roughy!" she cried, delicious with excitement as she danced on the beach.

Like a statue, on the opposite shore stood a black husky with white face markings, chest and socks, intently watching her.

"Roughy! Roughy!" she called, frantically waving her arms at the motionless animal, while tears blurred her eyes. "Oh, they're back! Alan's back!" she repeated ecstatically, between sobs. "He didn't—forget us! Alan's—back!"

The watching dog went quick with life. With a wild yelp he plunged into the swift river, his powerful legs driving him like piston rods. Keeping abreast of him as the current carried him downstream, the girl followed the shore, calling to him as he swam.

"Roughy, dear old Roughy! Where's Alan, boy?"

His feet touched bottom and, with a lunge, he was out. With a shake the great dog sent the water flying, then froze as if carved from stone, bars forward, nostrils working, as he studied her through oblique eyes.

"Roughy, don't you know Heather?"

He reached her with a bound, snuffed at her outstretched hands, then rearing, as he whined his recognition, beat her shoulders with his great paws while his red tongue sought her face.

Circling the wet neck of the wriggling dog with her arms, Heather kissed the white star on the massive skull, then with the yelping husky leaping beside her, she returned to the landing beach. There, leaving her, he quickly disappeared up the path to the cabin and as quickly returned.

"Where did you leave Alan, Roughy? Where's Alan?" she demanded, seizing the dog by his jaws and looking into his brown eyes.

The husky sprang away from her and stood with nostrils working, gazing at the opposite shore. Then, yelping, he plunged into the river.

"Who-hoo-o-o! Heather!" yelped across the water. There, on the stony beach stood a man, a tumble across his forehead supporting the pack on his back. Beside him romped three huge dogs.

Heather waved in return, her knees shaking with excitement and the joy of seeing him. "Who-hoo-o-o, Alan!"

Running to a canoe lying bottom up on the beach, she turned it and, flinging it by the gunwale, slid it into the stream and paddled hard in the wake of the swimming Roughy.

"You—you kept your word! You didn't forget us?" she choked, winking back the tears as the boat grounded.

Alan dropped his pack and seized both the girl's hands as he swung her from the canoe. "Heather McQueen," he laughed, his appraising eyes sweeping her strong, graceful figure from golden crown to moccasins. "What a big girl you've grown since I saw you!"

"Oh, didn't he be so glad, Alan! He was beginning to think—"

Cameron's bronzed features sobered as he thought of the police he had left over on the Mad headwaters. "But you, Heather, you knew I'd keep my word?"

She nodded. "Yes, I knew. What a shock Rough gave me! Alan! I thought he was a bear when I first saw him upstream."

"He knew you?"

"Knew me? He swam over when I called and almost smothered me, the old dear."

"Heath's more than I did, Heather," he laughed.

Heather's eyes fell before his. "Oh, you got your dogs and what beauties!" she cried as the three Ungavas thrashed in the water of the shore, yelping at the swimming Roughy.

"Two slate-gray and a brown one! Dad'll be so glad! Why he's talked about nothing but your coming back."

"Here you, Shot, Powder!" he called. "Come here! Don't try to touch them now, Heather. You're shy of strangers, aren't you, Rogue, you old slinger!"

The dogs came in from the water and gathered around Alan.

P.S.

Warns United States

Says Defeat of Allied Cause Would Render U.S. Helpless

Major-General A. M. Tutbill, adjutant general of Arizona, asserts victory for Germany in the war would render the United States "virtually helpless, economically and militarily."

He told the Arizona National Guard, "I believe we will enter the war and added:

"If Germany wins and takes over the fleets of France and Great Britain, it would have complete control of the sea and its air force would outnumber us 15 to 1. Where will we be? What becomes of our overseas trade?"

"The argument is heard that 3,000 miles of water separates us from Europe, but Brazil is closer to Germany than it is to the United States and if they should begin by colonizing it, the sea barrier would work against us instead of them."

As to national defence, he commented: "We haven't any."

A Strange Fact

Some New Zealanders Do Not Regard Rabbit As Meat

Rabbit provides a fairly popular dish in many New Zealand households, but those who enjoy their rabbit stewed, fried, or baked might be more than a little surprised to hear that in some quarters it is not regarded as meat. This strange fact was brought to light at a sitting of the industrial magistrate in Dunedin, when a factory manager was giving particulars of his employees who were covered under the New Zealand freezing workers' award. "We can all types of meat," he said, "and the workers engaged in this work are covered by the freezing workers' award; that is, except those canning rabbits. The inspector of factories has ruled that rabbit is not meat." "Not meat?" queried the industrial magistrate, Mr. J. A. Gilmore, with a smile. "What does he call it? Underground poultry?"

Another Discovery

Scientists Take Temperature of Fingers To Gauge Emotions

Taking the temperature of the fingers is a new method of gauging emotions, just announced by two New York physicians at a scientific meeting at Palo Alto, Cal. Tension, anxiety and conflict reduce the temperature by as much as 23 degrees in an hour, it is said. Anger, fear, depression and elation produce a lesser cooling, while thoughts of love and marriage send the Fahrenheit upward.

All this may be very scientific and may even revolutionize the process of psychological diagnosis. But it also suggests a new technique for amorous young men to adopt with a bashful suspect toward the objective of holding hands in the moonlight.

Supply Serums

Hon. Harold Kirby, Ontario minister of health, announced that department of health laboratories will supply the federal government with quantities of serums and vaccines for wartime use.

Victim (sadly): I got that watch from a former employer after I'd been with him ten years.

Footpad: Lumme, Guv'ner, you was lost, wasn't you!

Demountable rims, magnetic drag speedometers, and multiple-disc clutches made their appearance on automobiles introduced in 1907.

Wool made from milk resembles natural wool more closely than synthetic rayon resembles silk, chemists report.

Trans-Canada Highway

Completion Of Big Bend Project In Rockies Will Open Traffic From Port Arthur To Vancouver

New impetus to tourist travel across the Canadian Rockies is forecast with the completion of the Big Bend Highway, which is expected to be open to traffic next summer. The prospect of being able to drive from Vancouver to Port Arthur in being hailed by motorists on both sides of the Rockies as a development rivaling the completion of the first transcontinental railway more than a half century ago. Not only will the new highway provide a direct route from Western Ontario and the Prairie Provinces to the Pacific Coast, but it will also bring such world famous tourist centres as Lake Louise, Banff and Jasper within easy reach of motorists from Vancouver and the coast cities of the United States.

The Big Bend Highway has been built around the great northern bend of the Columbia River between the towns of Revelstoke and Golden in British Columbia. It is 193 miles in length and on completion will form the final link in the western half of the Trans-Canada Highway, which will ultimately extend from Halifax to Vancouver, a distance of approximately 3,500 miles.

With a rich historical background of exploration and conquest, of fur traders and gold-seekers, the area through which the Big Bend Highway passes comprises a magnificent mountain region within sight of snowfields, glaciers and all the other charms of a truly alpine world. The first white man to journey around the Big Bend of the Columbia River was David Thompson, noted surveyor and geographer, who was engaged by the North West Company to establish fur trading posts in the region west of the Rockies. For the greater part of its route the new highway skirts the Columbia River, affording splendid views of the snow-capped Selkirk Mountains and of the giant glaciers which form part of the main divide of the Rockies. It passes through one of the finest stands of virgin timber in the West, where giant cedar trees having butts up to six feet in diameter rise above the roadway along with fine specimen spruces which attain a height of 150 feet. Scattered groves of stately firs from three to four feet in diameter are also found along the way.

To Protect Apple Market

Policy Designed To Cope With Marketing Problem

To cope with the wartime loss of Canada's apple market in the United Kingdom, the Dominion government announced a comprehensive policy designed to meet the separate regional needs of the apple industry.

The plan provides for government purchase of 1,500,000 barrels of export varieties in Nova Scotia, which will be processed by canning or drying. This may be expanded by an additional 250,000 barrels if conditions warrant.

In British Columbia, the government will purchase up to 500,000 boxes of export varieties if unsold by next March 31, or earlier if mutually agreeable.

Ontario and Quebec growers will be protected from possible dumping of the surpluses from British Columbia and Nova Scotia by zoning export varieties in Nova Scotia, which the Central Canada market for growers in that zone.

Since the Canadian home market could not consume the entire crop, Hon. J. G. Gardiner, agriculture minister, submitted a detailed plan to the government aimed at relieving the situation.

The basic price to be paid British Columbia's apple industry for a maximum of 500,000 boxes is \$1.05 a box.

Prices to Nova Scotia growers on 1,500,000 barrels are: \$1.47 a barrel for No. 1 large; \$1.29 for No. 2 small; \$1.02 for domestic large; and 81 cents for domestic small.

The plan also provides for stiffening of grading regulations in the domestic market and a nation-wide advertising campaign to increase consumption in Canada.

A Great Gesture

New Zealand Offers Fully Equipped Army Division To Britain

New Zealand's offer to send an army division to aid Britain "in any part of the world" was announced in a ministry of information communique at London.

"Announcement of the prime minister of New Zealand, added the dramatic words, 'We stand or fall together, in war or peace, defeat or victory,' the communique said.

"From a little country of 1,500,000 inhabitants, the offer of a fully equipped division for service in any part of the world is a great gesture."

Lifts Grease OFF POTS AND PANS

No need to scrape and scrub in slimy water. A solution* of Gillett's Pure Flake Lye just lifts off grease layers... loosens hard-baked food... takes the drudgery out of washing up. Keep a tin always handy!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells how this powerful cleaner clears clogged drains... keeps out-houses clean and odorless by destroying the contents of the closet... how it performs dozens of tasks. Send for a free copy to Standard Brands Ltd., Fraser Ave. and Liberty Street, Toronto, Ont.

Ward Of British Sailors

Gunsboat's Crew Raised Fund To Educate Chinese War Orphan

A foster-father has been found for the best-known war orphan in China, the baby girl who was saved last October by bluejackets of the British river gunboat Sandpiper at Changsha, capital of Hunan Province.

The Chinese secretary of the British Methodist Mission at Changsha has legally adopted the infant, who was given a Chinese name meaning "Water Fairy" by her rescuers.

During a Japanese air raid on Changsha the baby was hidden in the water from a bombed gun, rescued by British sailors, given artificial respiration on the deck of the Sandpiper, and then sent to the American Yale-in-China Hospital at Changsha.

While in this hospital she became the godchild of Mrs. Clark Kerr, British Ambassador to China, and the ward of Commander W. E. J. Eames, the Australian commander of the gunboat, and the rest of the ship's company.

The crew of the Sandpiper, Reuter states, has raised an education fund of 1,000 dollars for the little girl, ready for the day when she will be old enough to go to school.

Just A Fallacy

An expert nutritionist of the Ohio State Health Department asserts that the saying, "Don't eat unless you're hungry," is not to be followed invariably because some persons with poor appetites actually need more food at all times than they feel like eating. And it is a fallacy, she asserts, that you can't successfully digest food that's distasteful to you.

Nine times in ten a person who asks you a question isn't seeking information. He either wants to tell you his answer, or he's trying to start an argument.

OPEN SEASON ON PRAIRIE CHICKEN and RUFFED GROUSE

Owing to the southern
boundary of the open zone for
the above inadvertently omitted
from the regulations printed on the reverse side of
the Bird Game Licenses and
on the posters, some confusion
has arisen. Therefore, it
should be clearly understood
there is no open season what-

ever on the above birds this
in the Province of Alberta
south of the main line of the
Canadian National Railway,
starting at Butte in the East
and running through Wainwright
to the city of Edmonton,
thence west through
Edson to the boundary of the
Forest Reserve, just west of
Entrance:

Mr. George Andetson who
had been employed for some
weeks near Alask returned
Saturday.

Before Bed Snacks

By BETTY BARCLAY

An early dinner and long evenings make little people hungry round go-to-bed time. They clamor for "something good" and insist upon having it.

Too heavy before-bed foods are not advisable. A light rennet-curd, rich in milk and delicious to the taste makes an ideal bedtime lunch for George or Grace. As these desserts require no eggs, no baking and no boiling, but may be made quickly and placed in the refrigerator to become cool, they please the busy mother as well as her hungry children.

A dessert like the following furnishes milk in a very pleasing form, and gives the children a delightful surprise — for here is Snow White and her seven little friends in a dainty taste-treat that will intrigue young fancies — yet it is so light and digestible it helps to woo pleasant dreams.

Snow White and The Seven Dwarfs
1 package Vanilla Rennet Powder
1 pint milk
1 cup whipping cream
Snow white angel food cake
Seedless raisins rolled in Raspberry Rennet Powder or pink sugar

Set out 5 dessert glasses. Warm milk slowly, stirring constantly until LUKEWARM — 120° F. A few drops of the milk on the inside of your wrist should feel only comfortably warm. Remove from stove. Stir Rennet Powder into milk briefly until dissolved — not more than one minute. Pour at once, while still liquid, into dessert glasses. Place a slice of snow-white angel food cake in each dessert while still liquid. Let set. When ready to serve, top each dessert with whipped cream and seven seedless raisins rolled in Raspberry Rennet Powder or pink sugar.

Dr. Roy C. Thorpe Buried Oct. 4th.

Well Known City Dentist
Was Native Son, Educated
In Calgary

Dr. Roy Clarence Thorpe, aged 40 years, of 424 Premier Way, died at the home of his mother, Mrs. Matha Thorpe, 502 Second avenue west, Monday afternoon, following a heart attack. Dr. Thorpe was a well known dentist in Calgary. At the time of his death he had just resumed his practice following a five month period of recuperation due to a previous heart attack.

Dr. Thorpe was born in Calgary and received his early education in the public and high schools of this city. Later he attended the University of Alberta, and in 1929 he received his degree as doctor of Dental Surgery.

He was a member of the Gryo Club, Zetland Lodge, A. F. and A. M., and the Native Sons Association.

Surviving are his wife, Audrey; a son, John; his mother, all of Calgary; three sisters, Mrs. Wallace Tombs, Mrs. Norman Jacques, both of Calgary and Mrs. E. Jacques of Arrowwood; formerly of Chinook, two brothers, John of Winnipeg and Frank of Washington.

Funeral services were conducted by Rev. George W. Kerby on Wednesday afternoon at the Jacques funeral home. Burial in the Union cemetery.

Funeral services were held in Youngstown on Monday, October 2nd, for Mrs. Antonio Hettler.

George Lees Was Killed

Word was received announcing the death of George Lees, son of Mr. and Mrs. Jas. Lees of Oyen.

George was killed while returning by car from B. ft. when the car he was driving collided with another car.
